

Do you want to take your photography to a new level and capture images which are not only technically great but will also have a real impact on your viewer? On this course you will learn advanced photographic techniques that enable you to create images that stand out, and capture the attention and imagination of your viewer. Once you have learnt to understand and master light, you are taught how different camera and compositional choices can add impact to an image. These tools help you create professional looking images in any situation. Learn to master your external flash unit and discover its full creative potential.

This course is presented on one evening or morning a week over 4 consecutive weeks, with each class being made up of both theory and practical workshop sessions.
